

DARSHAN BS

Bengaluru, India | +91 9110442362 | darshanbs04@gmail.com

PROFESSIONAL SUMMARY

Backend Engineer with **2 years of experience** specializing in high-throughput distributed systems using **Java, Spring Boot, Apache Kafka, and MySQL**. Proven track record architecting in-house modular platforms scaling to 300K–500K daily transactions and automated reconciliation engines that eliminate ~90% of manual auditing. Skilled in event-driven architecture, Redis caching, and AWS integrations, delivering low-latency, fault-tolerant production services

TECHNICAL SKILLS

Languages: Java, SQL, Python

Frameworks & Backend: Spring Boot, Spring Data JPA, REST APIs, Microservices, Modular Monolith

Messaging & Concurrency: Apache Kafka, Event-Driven Architecture, Asynchronous Processing

Core Competencies: Distributed Systems, System Design, Fault Tolerance, API Design, Scalability

PROFESSIONAL EXPERIENCE

DTDC Express | Bengaluru, India

Software Engineer – Backend | October 2024 – Present

- **In-House Core Booking Platform:** Architected a modular **Spring Boot** booking engine to bring the complete platform in-house, scaling to **300K–500K daily bookings** and boosting company margins by eliminating third-party vendor fees.
 - **Event-Driven Architecture & Pipelines:** Designed high-throughput asynchronous **REST APIs** and **Kafka** event streams, decoupling order ingestion from downstream publishing to ensure fault tolerance and ultra-low latency under peak loads.
 - **Transactional State & Caching:** Implemented resilient data layers using **MySQL, Redis**, and Spring-managed transactions, ensuring atomicity across rate estimation, wallet validation, and order persistence with zero data discrepancies.
 - **Automated Cost Reconciliation Engine:** Developed automated data pipelines comparing vendor vs. internal billing records to detect discrepancies, auto-trigger downstream rebilling APIs, cut manual auditing by **~90%**, and prevent revenue leaks.
 - **Cloud, CI/CD & Engineering Hygiene:** Integrated **AWS Secrets Manager**, S3, and Jenkins CI/CD pipelines while enforcing an 85%+ code coverage standard (JUnit/Mockito) and conducting RCAs to reduce operational overhead by 60–70%.
 - **Recognition:** Awarded **Employee of the Month** for high-impact backend delivery and system stability improvements.
-

EDUCATION

- **Bachelor of Engineering in Computer Science** | 2024
The National Institute of Engineering, Mysuru, Karnataka
